Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate or render obvious a semiconductor device substantially as claimed. Specifically, the prior art of record does not anticipate, teach or suggest a semiconductor device substantially as claimed, wherein the device comprises L-shaped spacers covering a respective one of the side walls of a gate pattern disposed on a semiconductor substrate, such that an air gap exists between the lateral portion of each of the L-shaped spacers and the source/drain region over which the lateral portion extends, the entire bottom surface of the L-shaped spacer being exposed and delimiting the air gap, as recited in claim 1. Furthermore, the prior art of record does not anticipate, teach or suggest a semiconductor device substantially as claimed, wherein, in addition to the air gap that exists between the lateral portion of each of the L-shaped spacers and the respective source/drain region over which the lateral portion extends, the device further comprises support portions interposed between the spacers and the gate pattern, such that the gate pattern and the support portions are disposed over a region of the substrate confined between the lightly-doped source/drain regions in the source/drain regions, as recited in claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
